Rulesets / New branch ruleset

Protect your most important branches

[Rulesets](#) define whether collaborators can delete or force push and set requirements for any pushes, such as passing status checks or a linear commit history.

Ruleset Name \*

Enforcement status

🕒 Disabled ▾

Bypass list

Exempt roles, teams, agents, apps, and users from this ruleset by adding them to the bypass list.

Actors

All ▾

+ Add bypass ▾

Bypass list is empty

Target branches

Which branches should be matched?

Branch targeting criteria

Add target ▾

Branch targeting has not been configured

Rules

https://github.com/PSactiva/ObraFacil/settings/rules/new?target=branch&enforcement=disabled

1/4

Which rules should be applied?

Branch rules

- ☐ Restrict creations  
Only allow users with bypass permission to create matching refs.
- ☐ Restrict updates  
Only allow users with bypass permission to update matching refs.
- ☒ Restrict deletions  
Only allow users with bypass permissions to delete matching refs.
- ☐ Require linear history  
Prevent merge commits from being pushed to matching refs.
- ☐ Require deployments to succeed  
Choose which environments must be successfully deployed to before refs can be pushed into a ref that matches this rule.
- ☐ Require signed commits  
Commits pushed to matching refs must have verified signatures.
- ☒ Require a pull request before merging  
Require all commits be made to a non-target branch and submitted via a pull request before they can be merged.

Hide additional settings ^

Required approvals

1 ▾

The number of approving reviews that are required before a pull request can be merged.

- ☒ Dismiss stale pull request approvals when new commits are pushed  
New, reviewable commits pushed will dismiss previous pull request review approvals.
- ☒ Require review from specific teams  
A collection of reviewers and associated file patterns. Each reviewer has a list of file patterns which determine the files that reviewer is required to review.

0 reviewers

+ Add reviewer

No reviewers have been added

- ☒ **Require review from Code Owners**  
Require an approving review in pull requests that modify files that have a designated code owner.
- ☐ **Require approval of the most recent reviewable push**  
Whether the most recent reviewable push must be approved by someone other than the person who pushed it.
- ☒ **Require conversation resolution before merging**  
All conversations on code must be resolved before a pull request can be merged.
- ☒ **Require an additional approval for unattributed Copilot pull requests** [Preview](#)  
When Copilot opens a pull request without a human collaborator, require one more approving review if a non-zero approval count is required.

#### Allowed merge methods

Merge, Squash, Rebase ▼

When merging pull requests, you can allow any combination of merge commits, squashing, or rebasing. At least one option must be enabled.

- 
- ☐ **Require status checks to pass**  
Choose which status checks must pass before the ref is updated. When enabled, commits must first be pushed to another ref where the checks pass.
- 
- ☒ **Block force pushes**  
Prevent users with push access from force pushing to refs.
- 
- ☐ **Require code scanning results**  
Choose which tools must provide code scanning results before the reference is updated. When configured, code scanning must be enabled and have results for both the commit and the reference being updated.
- 
- ☐ **Require code quality results**  
Choose which severity levels of code quality results should block pull request merges. When configured, a code quality analysis must be done on the pull request before the changes can be merged.
- 
- ☐ **Restrict code coverage**  
Enforce minimum line coverage thresholds on pull requests. When configured, uploaded coverage data must meet the specified criteria before changes can be merged.

☐ Automatically request Copilot code review

Request Copilot code review for new pull requests automatically if the author has access to Copilot code review and their premium requests quota has not reached the limit.
